

Specific Setup Information

Macintosh OS X

Click on the "Finder" icon in the dock at the bottom of the screen.

Click the Applications icon in the Finder window toolbar. Then double click on the Internet Connect icon.

You will see the screen in Figure 1.

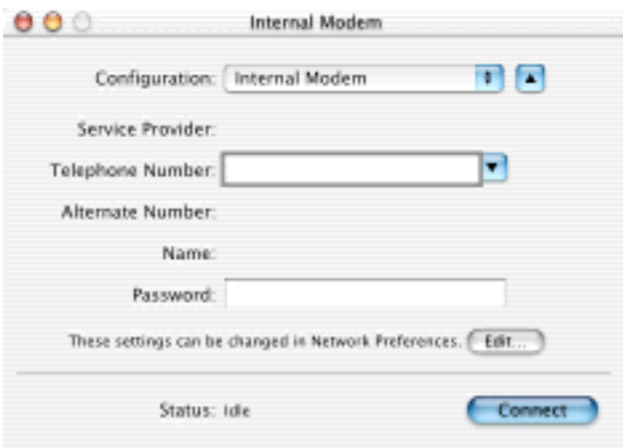

Figure 1. Internet Connection Window

Click on the Edit button. You will see the screen in Figure 2.

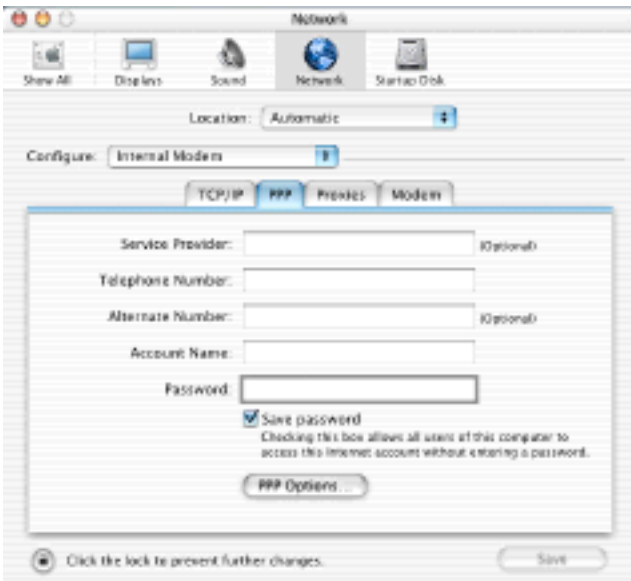

Figure 2. PPP Configuration

Leave the Service Provider box blank. Enter the phone number for the library's modem pool in the Telephone Number box. If you have call waiting, you can disable it by entering ***70**, before the phone number.

Leave the Alternate Number box blank. Enter your login/username in the Account Name box.

Enter your password in the Password box. You can check the Save password button if you don't want to enter your password each time you connect.

Click the TCP/IP tab. You will see the screen in Figure 3.

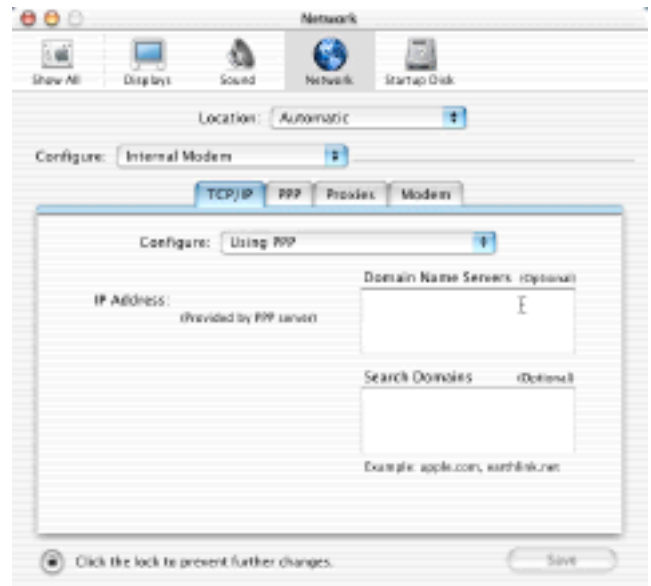

Figure 3. TCP/IP Configuration

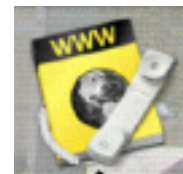

Type the Primary DNS, Secondary DNS, and Third DNS numbers in the Domain Name Servers box.

Type the Domain Name in the Search domains box.

The DNS numbers and Domain Name are listed on the General Setup Information Sheet.

Click on the Save button, and close the Network window.

Click the Internet Connect icon in the dock.

You will see the screen in Figure 4

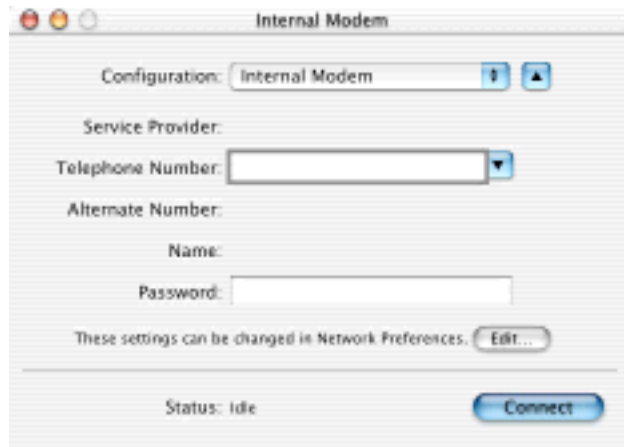

Figure 4. Internet Connection Window

Enter your password in the Password box if you haven't already.

Click the Connect button.

After you have successfully connected you will see the screen in Figure 5.

Figure 5. Connected

After you are connected, click on the Internet Explorer icon in the dock.

To disconnect, click on the Internet Connect icon in the dock and then click on the disconnect button in the window that appears.
